At this point, all of your data can be kept for 30 days. This includes the Email Subscriptions, Sales Opportunities, Chatter, Contacts, Opportunities, Leads and Tasks. For example, if you were a small business owner, your CRM would show you the status of every customer, what products are in high demand, the leads you are receiving, the leads that are just one business call away, the products you need to buy to get your inventory to the right level, and the budget you have to make your next purchase. If you are an accounting expert, your CRM will help you track every aspect of your small business from sales, purchases, to your cash flow and everything in between. CRM Software Overview CRM Software (also referred to as Customer Relationship Management Software) is an acronym for Customer Relationship Management. This is a new category of computer applications. The word 'CRM' is often used as a generic term for Customer

Relationship Management, meaning that a CRM application offers the ability to manage a customer relationship. CRM provides a solution for managing a business' interactions with clients, vendors, and other business partners. CRM is also known as Customer Relationship Management (CRM). CRM software is essential to a business that has a large client or customer base. CRM software provides functionality to manage the entire sales cycle of business to business relationships. CRM software provides a single integrated platform for sales, marketing, service, and technical support with real time data and ability to share information across the entire organization. CRM software has also been used to analyze and improve sales performance. Web Based CRM Software Web-Based CRM software is a combination of CRM and Internet. Web-based
